

# GENERATIONS OF INTEGRITY

## A Smarter Inventory for You

Our two, full-line presses allow for quick inventory turnover optimization, a flexible stocking program for high-runner products, and an undeniably short lead-time.

## Tailor-Made

As your flexible partner, we can produce to your specifications such as non-standard or special formats as well as an array of front and back-side combinations.

## We are the only Polymer and TFL - Thermally Fused Laminate panel manufacturer in Southern California

With an in-house production line, we supply the furniture, cabinet, and interior architectural woodworking industries. We take pride in producing our melamine panels in the United States.

Conveniently located in the heart of Orange County, Southern California at our 50,000 square foot manufacturing facility, we produce up to 3,000 sheets daily with our two full line presses, allowing us to support our clients with flexible and efficient possibilities for product manufacturing and stocking.

Our experienced team has manufactured storage systems and laminate panels over three generations; we've been in your position and value our relationship with you.

***Duramar is your hardest working partner,  
devoted to making your job easier.***

**Dream up your next project and use Duramar collections to add style and personality to your spaces.**

## OUR BRANDS

**DuraDECOR** is our Thermally Fused Laminate collection of décor paper-based decorative panels. It features beautiful designs that lend a soft feel to furniture and architectural woodwork in any environment. It is available in three textures: Ultratex, Satin and Classic.

**DuraLUX** is our polymer base laminate board made in cleanroom production facilities and is the ideal option to add rich solid colors while creating modern spaces.

Our two **DuraLUX** lines are superior to yellowing effects and light resistance to high-end lacquered finish materials, these features make DuraLUX a highly durable and cost-effective alternative for your furniture and surfaces.

**DuraLUX Acrylic** is available in a reflective Gloss shine finish, it features a unique layer construction and UV hard surface coating for color stability; and scratch, chemical and stain resistance.

**DuraLUX Premium** is available in a color palette in matching gloss and an incredibly soft anti-fingerprint matte finish.

## Safe, durable, and on-trend products

Duramar is committed to collaborating with designers and architects to create beautiful spaces. Through providing surface solutions for interiors through an elegant range of on-trend and classic designs we will work with you to seamlessly transform any residential, hospitality, healthcare, or commercial project.
