

Introducing our Thermally Fused Laminate line made to create breathtaking spaces.

DuraDECOR by Duramar is a décor paper treated with a melamine resin, thermally pressed and fused permanently onto a particle or fiber wood-based panel on both front and back faces, resulting in a strong and resistant decorative panel.

We work with the most discerning global suppliers to offer high-quality, and responsibly managed forests certified products that feature exceptional qualities, including a smooth homogeneous surface and low-abrasive core that facilitate our lamination and your woodworking processes.

About Duramar

Duramar, the only Polymer and TFL- Thermally Fused Laminate panel manufacturer in Southern California, is your flexible partner to provide on- trend and reliable surface solutions with unparalleled service for furniture and architectural woodworking interior applications. To learn more visit duramar.com

MAIN APPLICATIONS

DuraDECOR is ideal for your horizontal and low impact vertical interior applications, such as:

- Kitchen cabinets
- Bathroom cabinets
- Closets, shelving, and storage
- Home entertainment centers
- Office furniture
- Door core
- Wall paneling and built-in casework
- Store Fixtures and displays
- Hotel, restaurant, and healthcare centers' furniture and woodworking

FEATURES & BENEFITS

- Available in three different textures
- Durable and cost-effective option for applications where veneer or solid wood are fragile or costly
- Ready to use without need for additional finishing
- Excellent machining characteristics
- Highly scratch- and-wear-resistant
- Consistent and uniform appearance
- Easy to clean with household cleaning products
- Waterproof faces
- Resistant to abrasion, rubbing, impact and knocks
